## NEWS FROM *FORBES*

(Disclaimer: I take no position on the content of the article of which all extrapolation from the article were taken, which appeared in the July 2017 issue of *Forbes Magazine*, entitled: "Stephen Hawking Predicts, This Pill will Change Humanity." Responsibility for the extrapolations belongs to me.) The article is very lengthy and not all of it could be duplicated in this Newsletter. An effort was made to select and "copy" key elements of the article...

What pill, you might ask. Well, according to the article, the pill is labeled Super Brain Boost, and according to many who have begun taking it, it lives up to all that the researchers said it does. Stephen Hawkins in an interview with Anderson Cooper on *CNN's Breaking News* made comments about a brain booster that would become the biggest event in human history. Quite a statement! He, "Stephen Hawking, credits his ability to function and maintained focused on such a high level to a certain set of 'smart drugs' that enhance cognitive brain function and neural connectivity, while strengthening the prefrontal cortex and boosting memory and recall." Hawkins went on to add, "The brain is like a muscle, you got to work it out and use supplements just like body builders use, but for our brain, and that's exactly what I've been doing to enhance my mental capabilities".

The article continues: "Everyone that has taken this, from athletes like Tom Brady to musicians like Kanye West have nothing but praise for the brain booster, which doubles IQ, skyrockets energy levels and connects areas of the brain not previously connected. Super Brain Boost works so well for these guys, we had to ask . . . Is it safe?

According to the article, over a decade ago, Harvard assembled a team of neuroscientists to work on coming up with a natural brain supplement that could *effortlessly boost IQ*. Today, those scientists made the breakthrough they were seeking and made the discovery of

## ANSWERED PRAYER

Again, there are no answered prayers. So, I pose the following questions:

- Are we praying to The Almighty God, in the name of Jesus?
- Are we failing to accept His answers when they are not the answers we are seeking?
- Are we joining others in prayer?
- Are our prayers in harmony with the will of The Lord?
- Are we praying for others and their families as we would have them pray for us and our families? And others?

Please remember that if you wish to share an answered pray but want to remain anonymous, your wish will be respected.

Continued from Column 1...

a lifetime. They came up with a brain boosting smart drug that surpasses all limit of known science. The supplement they created is now THE best treatment available to improve memory, sharpen attention, increase focus, and boost overall IQ.

After numerous rounds of testing, results were astonishing. One test subject was quoted as saying:

*"As soon as I took it, it started working within minutes of taking it... All of a sudden, it felt like a dark cloud had been lifted up from in front of me.*

*I was more alert, more focused, had long lasting energy, and experienced a mental clarity that I'd never felt before".*

--Ben Lishger, Harvard Sophomore

The Lead Researcher on the team, Dr. Rosenhouse, gave us (Stephen Hawking and Anderson Cooper) an exclusive inside look at the ingredients that make up the revolutionary smart drug:

## PASTOR'S CORNER

### Prayer Seasons Bring Encouragement

--As workers, let us seek the Lord together. Of our own selves we can do nothing; but through Christ we can do all things. God intends that we shall be a help and blessing to one another, and that we shall be strong in the Lord and in the power of His might. . . . God lives and reigns; and He will give us all the help we need. It is our privilege at all times to draw strength and encouragement from His blessed promise, "My grace is sufficient for you."--Historical Sketches, p. 129. (1886) {Ellen White, *Evangelism*, p. 98}

*"It is engineered with all the ingredients containing vitamins and essentials that your brain needs to ensure improvement in all aspects of cognitive growth, while including short and long term memory, focus, energy, problem solving capabilities and total brain performance."*

We are all very grateful to have this now, as I believe it can help everyone on the planet and take us to the next stage of evolution. (Of brain research, I presume.) But what does that mean for the rest of us? Could this pill help ordinary people like you and me? The only way to find out is to try it and luckily the Harvard tea, has patented and sold the rights to major manufacturers who currently have a limited 3 month supply."
